DETAILED ACTION

1. This office action is in reply to an amendment filed on December 12, 2005. **Claims 1-21 are pending and** have been examined. Applicant has submitted the terminal disclaimer to overcome the double patent rejection made previously. Accordingly, the examiner's double patent rejection made by previously is overcome. Thus all claims are allowed.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with **William S. Galliani** Reg. No 33,885 on 08/04/2005.

The application has been amended as follows: In the claims

~~-4-~~15. (Currently Amended) A data processing apparatus that facilitates managing public keys through a server, comprising:
a storing mechanism that is configured to store a client public key in a database at the server, after confirming user identification. wherein the client public key is produced by a client computer in response to user supplied information. and wherein the client public key is delivered as an email message;

a lookup mechanism that is configured to allow other clients to lookup the client public key in the database; and

a key removal mechanism that is configured to,

send a verification request from the server to the client asking if the client public key remains valid, and to

remove the client public key from the database, if an affirmative response to the verification request is not received.

Allowable Subject Matter

2. **Claims 1-21** are allowed.
3. The following is an examiner's statement of reasons for allowance:
4. With respect to the independent claims 1, 8 and 15 the art on the record, namely the combination of **Liu and Newman** discloses all of the limitation of the recited claim 1,8 and 15 before the claims were amended. However claims 1, 8 and 15 are amended by the applicant and new limitation has been added and the art on the record namely the combination of **Liu and Newman** does not disclose or suggest the particular added limitation of the respective claims 1, 8 which is recited as follows " receiving a client public key from a client at the server, wherein the client public key is produced by a client computer in response to user supplied information and wherein the client public key is delivered as an email message; Storing the client public key in a database at the server, after confirming user identification

With respect to claim 15 a similar limitation recited above has been added.

None of the prior art of record taken singularly or in combination teaches or suggests a method/a computer-readable storage medium/a data processing apparatus with functional limitations recited above with the combination of the other limitation recited in respective claims such as,

Allowing other clients to lookup the client public key in the database;

Periodically sending a verification request from the server to the client asking if the client public key remains valid; and

If an affirmative response to the verification request is not received, removing the client public key from the database.

For the reasons provided above, the amended independent claim 1,8 and 15 are allowed.

5. **The dependent claims 2-7, which are dependent on the independent claim 1 and the dependent claims 9-14 which are dependent on the independent claim 8 and finally the dependent claims 16-21 which are dependent on independent claim 15** being further limiting to the independent claims, definite and enabled by the specification are also allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance."
